

RAINBOW TROUT

ᐱᓐᓐᓐᓐᓐ

Habitat:

Freshwater Rivers, Lakes & Streams

Weight: 1 – 5 lbs.

Length: 11" – 18"

Rainbow trout are a popular freshwater game fish, known for their vibrant colors and strong fighting abilities. They are native to the Pacific Northwest and have been introduced to many other parts of the world.

Rainbow trout are anadromous, meaning they can migrate from freshwater to saltwater and back. However, they can also remain in freshwater their entire lives.

CUTTHROAT TROUT

pist

Habitat: Freshwater Rivers, Lakes, Streams

Weight: 3 - 5 lbs.

Length: 6" - 16"

Westslope Cutthroat Trout currently occupy only a fraction of their historic range. This shrinking range is particularly acute in the Pend Oreille Basin, which once held the most extensive distribution of Westslope Cutthroat Trout in the State of Washington, but now contains many miles of stream that are uninhabited due primarily to habitat degradation and non-native fish.
